National S'mores Day - August 10th

National S'mores day on August 10 recognizes the most popular campfire treat! Millions of people of all ages love this gooey, toasted treat.

S'mores consist of a roasted marshmallow with a layer of chocolate bar sandwiched between two pieces of graham cracker.

The origin of this tasty snack is credited to the entrepreneur Alec Barnum. However, the first recorded version of the recipe can be found in the 1927 publication of Tramping and Trailing with the Girl Scouts. Even though the Girl Scouts were not the first ones to make s'mores, Girl Scout groups describe them in their reports as early as 1925. Earlier recipes used the name "Some Mores." It is unclear when the word "S'mores" became the more common name.

End of Dog Days of Summer - August 11th

The phrase "Dog Days" conjures up the hottest, most sultry days of summer. The Old Farmer's Almanac lists the traditional timing of Dog Days: the 40 days beginning July 3 and ending August 11, coinciding with the heliacal (at sunrise) rising of the Dog Star, Sirius. The rising of Sirius does not actually affect the weather (some of our hottest and most humid days occur after August 11), but for the ancient Egyptians, Sirius appeared just before the season of the Nile's flooding, so they use the star as a "watchdog" for that event. Since its rising also coincided with a time of extreme heat, the connection with hot, sultry weather was made for all time: "Dog Days bright and clear / indicate a happy year. / But when accompanied by rain, / for better times our hopes are vain."

National Aviation Day - August 19th

Ever since 1939, August 19 has been celebrated as National Aviation Day, the legacy of a presidential proclamation first made by Franklin D. Roosevelt.

Selected because it was Orville Wright's birthday, the decision to revel in all things aeronautical came at an exciting time in aviation history.

Just 36 years after the Wright Brothers flew the first heavier-than-air flying machine in 1903, aviation was a growing, if not thriving industry in the United States and around the world.

New world speed and distance records were being set, airlines that still exist today were being formed and, as World War II began, both Allied and Axis Powers sought new ways to beef up aviation's role in world warfare.

By 1939, the National Advisory Committee for Aeronautics (N.A.C.A.) - NASA's organizational predecessor, was 24 years old and already well-established as the nations premiere aviation research laboratory in Virginia, and a brand new center just approved to be built in California.

New world problems with flying were being solved on the drawing boards and in the wind tunnels of N.A.C.A., enabling aircraft to fly faster, higher, further and with more and more cargo and passengers.

Today, with the N.A.C.A's research heritage still alive and well at NASA, it can be said that every U.S. aircraft an air traffic control tower in operation today uses some kind of NASA-developed technology.

Health Awareness Topic --- National Immunization Awareness Month

August is recognized as National Immunization Awareness Month (NIAM). The goal of NIAM is to increase awareness about immunizations across the life span, from infants to the elderly. August is the perfect time to remind family, friends, co-workers, and those in the community to catch up on their vaccinations. Parents are enrolling their children in school, students are entering college, and healthcare workers are preparing for the upcoming flu season.

Immunization is one of the most significant public health achievements of the 20th century. Vaccines have eradicated smallpox, eliminated wild polio virus in the U.S., and significantly reduced the number of cases of measles and other diseases. But despite these efforts, tens of thousands of people in the U.S. still die today from these and other vaccine-preventable diseases.

Immunization is one of the most effective ways to protect children and adults against many common infectious diseases. Keeping individuals healthier through immunizations results in lower associated social and financial costs for families, including time lost from school and work, as well as the expense of medical bills. Recommended vaccinations begin soon after birth and continue throughout life, and it's important to get the right vaccines in the right doses at the right time.

National Watermelon Day - August 3rd

The juicy, refreshing watermelon deserves it's own day, that's why we celebrate National Watermelon Day. Cultivation of this fruit dates back to 2000 B.C., with the first watermelon harvest on record occurring approximately 5000 years ago in Egypt. Traces of watermelon and it seeds have been discovered on sites of the 12th Egyptian Dynasty, including in the tomb of King Tutankhamen. Paintings of different types of watermelon have also been found in ancient Egypt inscriptions.

The sweet fruit that we enjoy today is the result of mutations over the course of thousand years of cultivation. Watermelon seeds were sold to traders passing through the trade routes in the Kalahari Desert in Africa. From there, the cultivation of the watermelon spread across Africa. The origin of the progenitor of the watermelon was in Africa, after which it spread into Mediterranean countries and other parts of Europe. By the end of the ninth century, watermelon cultivation became common in China and the rest of Asia.

According to "The Dictionary of American Food and Drink" by John Mariani, the word 'watermelon' first appeared in the English dictionary in 1615. The watermelon is commonly known as a type of melon, but it is not in the genus Cucumis. The outer rind of a watermelon is dark green with yellow stripes or spots. Over 300 varieties of watermelon are available in the U.S., ranging from red to white, and come in different shapes and sizes.

INTERNATIONAL CLOWN WEEK

August 1st - 7th

Clown Week began some time in the 1950's. Walt "Wabo" Savage is believed to be the man behind the original Clown Week. He reportedly picked August because it coincided with the birthdays of both his daughters.

Becoming a clown is serious business. Not just anyone can clown around every day. The training is nothing to joke about because clowns take their jobs seriously enough to have a code of ethics known as The *Eight Clown Commandments*. They also have an official prayer. Clowning around is not allowed during performances. Unless you're being funny, then clowning around is a requirement.

Clowns come in many forms. On Weary Willie Day, celebrate the clown who made the sad hobo famous. They create their own characters and storylines. Like celebrities do, many clowns will develop a following. For example, Bozo the Clown from children's television with his iconic red hair and Soupy Sales, also known for his children's television persona. There's also Willard Scott who first portrayed another redheaded clown with giant shoes - the hamburger-selling Ronald McDonald. Unfortunately, not all people think clowns are fun. Many people have a fear of clowns known as Coulrophobia. Celebrities such as Daniel Radcliffe and Johnny Depp are among those celebrities who suffer from coulrophobia.

A FEW OF OUR SHOUTOUT FOLKS

Women's Equality Day

At the behest of Rep. Bella Abzug (NY), in 1971 and passed in 1973, the U.S. Congress designated August 26 as "Women's Equality Day." The date was selected to commemorate the 1920 certification of the 19th Amendment to the Constitution, granting women the right to vote. This was the culmination of a massive, peaceful civil rights movement by women that had its formal beginnings in 1848 at the world's first women's rights convention, in Seneca Falls, New York. The observance of Women's Equality Day not only commemorates the passage of the 19th Amendment, but also calls attention to women's continuing efforts toward full equality. Workplaces, libraries, organizations, and public facilities now participate with Women's Equality Day programs, displays, videos showing, or other activities.

Joint Resolution of Congress, 1971 Designating August 26 of each year as Women's Equality Day

WHEREAS, the women of the United States have been treated as second-class citizens and have not been entitled the full rights and privileges, public or private, legal or institutional, which are available to male citizens of the United States;
 and WHEREAS, the women of the United States have united to assure that these rights and privileges are available to all citizens equally regardless of sex;
 and WHEREAS, the women of the United States have designated August 26, the anniversary date of the certification of the Nineteenth Amendment, as symbol of the continued fight for equal rights;
 and WHEREAS, the women of the United States are to be commended and supported in their organizations and activities,
 NOW, THEREFORE, BE IT RESOLVED, the Senate and House of Representatives of the United States of America in Congress assembled, the August 26th of each year is designated as Women's Equality Day, and the President is authorized and requested to issue a proclamation annually in commemoration of that day in 1920, on which the women of America were first given the right to vote, and that day in 1970, on which a nationwide demonstration for women's rights took place.

I think I'll be a clown when I get grown....
There ain't one thing in the world I can do about folks except laugh,
so I'm gonna join the circus and laugh my head off.

A CLOWNS PRAYER

As I stumble through this life, help me to create more laughter than tears, dispense more happiness than gloom, spread more cheer than despair.

Never let me become so indifferent that I will fail to see the wonders in the eyes of a child or the twinkle in the eyes of the aged.

Never let me forget that my total effort is to cheer people, make them happy and forget - at least momentarily - all the unpleasantness in their lives.

And, in my final moment may I hear You whisper: 'When you made My people smile, you made Me smile.'
